

Neurobiology in Salamanca, Spain

5-Week Summer Course: May 19 - June 18, 2020

The Neuroscience Study Abroad Program, sponsored by the University of Connecticut, the University of Salamanca, and Johns Hopkins University, offers a Neurobiology of Hearing course in English for Undergraduate and Graduate students. This unique program provides exposure to neuroscience and research at an international level while helping pre-med, neuroscience, engineering, and audiology students become familiar with Spain, its language, and culture. A short visit to Prague in the Czech Republic teaches neuroscience lab methods.
