

Dear colleagues,

The 10th Convention of the European Acoustics Association, Forum Acusticum 2023, will be held in presence in Torino (Italy), from September 11 to 15, 2023.

Forum Acusticum 2023 is a triennial international convention organized by the Italian Acoustical Association on behalf of the European Acoustics Association (EAA). The Congress will be a world leading event in the areas of acoustics and a great opportunity for participants to meet in person, to expand their knowledge, to share new techniques and competences, in the wide range of acoustics nowadays addressed in the community.

As organizers of the session “**Psychoacoustics in Communication**”, under the theme “**A11: Psychoacoustics**”, we would like to cordially invite you to submit a paper to this session.

The aim of the session is to explore scientific understanding of human communication derived via auditory experimentation and modelling. Aspects of communication include speaking and hearing, communication disorders, and perception of timbre and music. Particular emphasis is given to speech and voice quality characterization, audiology (audiometry, hearing devices, implants), and quality of (natural/synthetic, coded/compressed, and recorded/transmitted) sound in general.

Papers can be submitted for oral (a 20-minute time slot is allotted) or poster presentation through the Forum Acusticum 2023 website, <https://www.fa2023.org>.

Submission for abstracts opens **September 1, 2022**, deadline is **January 31, 2023**, while papers need to be submitted afterwards by **April 30, 2023**. The abstract will be 200-words long and papers can be from 2 to 4 pages. All the papers will undergo a peer review process.

Thank you in advance for your kind consideration, and if you have any questions do not hesitate to contact us. We look forward to seeing you in Torino!

Sincerely,

Philipp Aichinger, Jody Kreiman
